

Any fund balance remaining will be used on future projects in Marquette's downtown district. As the 2011 Marquette DDA TIF plan indicates, the DDA anticipates assisting the City of Marquette with future infrastructure projects that include, but are not limited to: Sidewalk and streetscape improvements, a redevelopment of the 100 block of W. Baraga Avenue, wayfinding, maintaining the Bluff Street Parking Ramp, and expanding the available parking supply. This fund balance is expected to be expended in the next 4-5 years.
